Electrolux air-o-chill

Blast Chillers 50 kg - 10 GN 1/1

Chilling means bringing the temperature of cooked food from $+90^{\circ}$ C to $+3^{\circ}$ C in a short time lap which does not allow bacterial growth.Electrolux Blast Chillers reduce temperature from $+90^{\circ}$ C to $+3^{\circ}$ C at food core in less than 90 minutes: the models detailed on this sheet performs this cycle up to a 50 kg full load. After the Blast Chilling a holding cycle starts automatically to maintain food at $+3^{\circ}$ C. Blast chilled food has a solid 5 days shelf life without loss of flavour, nutritional values and weight. The opportunity to prepare in a single shot the food to be used in different times during the week enables a better work scheduling and therefore a sensible reduction in labour costs.

OPERATING MODES

• Cruise: the chiller automatically sets the parameters for the quickes and best chilling (it works by probe).

- Soft Chilling (Air temperature –2°C).
- Hard Chilling (Air temperature –20°C).

• All the probe-driven cycles feature ARTE (Algorithm for Remaining Time Estimation) to make planning the activities easier.

• Holding at +3°C (automatically activated at the end of each cycle).

• Turbo cooling: the chiller works continuously at the desired temperature. Ideal for continuous production.

• It is possible to operate by time or by probe.

• The control unit provides several operating settings: time/core temperature according to NF and UK regulations, time/air

temperature/probe personalised according to national regulations, sterilizing cycle: UV lamps built-in (on request), 3 single sensor core temperature probes (as accessory), ideal for meats, automatic defrosting and manual defrosting. All parameters are programmable.

• 3-sensor core probe as standard.

• The control unit provides two large displays to read out: time, core temperature, cycle countdown, alarms, service information.

• Two customizable cycles (P1 & P2) for each operating mode, allowing to set the time and air temperature. These programs can be converted into ice-cream specialized cycles (shape maintainance and holding). • All information related to the different operating models are recorded: date, time, cycle, core temperature, holding temperature, HACCP accordance.

• An audible alarm starts when the cycle ends or terminates abnormally.

PERFORMANCE

• Blast Chilling cycle: 50 kg from +90°C up to + 3°C in less than 90 minutes.

• Chilling times can vary according to food quantity, density, moisture contents and type of containers. Chilling capacity according to NF* regulations is 36 kg.

CONSTRUCTION

• Internal and external finishing in 304 AISI stainless steel and back panel in stainless steel.

• High density polyurethane insulation, 60 mm tickness, HCFC free.

• Environmentally friendly: R404a as refrigerant fluid.

- Developed and produced in ISO
- 9001 and ISO 14001 certified factory.
- Inner cell with fully rounded corners.
- Door equipped with removable

magnetic gasket with hygienic design.Motors and fan waterproof protected IP20.

- Evaporator with antirust protection.
- Ventilator (fan) swinging hinged

panel for access to the evaporator for cleaning.

Electrolux air-o-chill Blast Chillers 50 kg - 10 GN 1/1

- Automatic heated door frame.
- Hot gas defrosting system.
- Solenoid valves.
- 1 thermostatic expansion valve.
- Feet 150 mm high.
- Stand alone printer as optional, built in on request.
- PC connection on request, gate RS 485.

INSTALLATION

- No water connections required.
- Waste water can be plumbed into drain, but can also be collected in an optional waste container.

*NF HYGIENE ALIMENTAIRE

certifying authority : AFAQ AFNOR CERTIFICATION. Adress:11, Avenue Francis de Pressense - 93571 Saint-Denis La Plaine Cedex - France. Conformity with regulation NF031. Certified guarantees: fitness for cleaning, thermal performance.

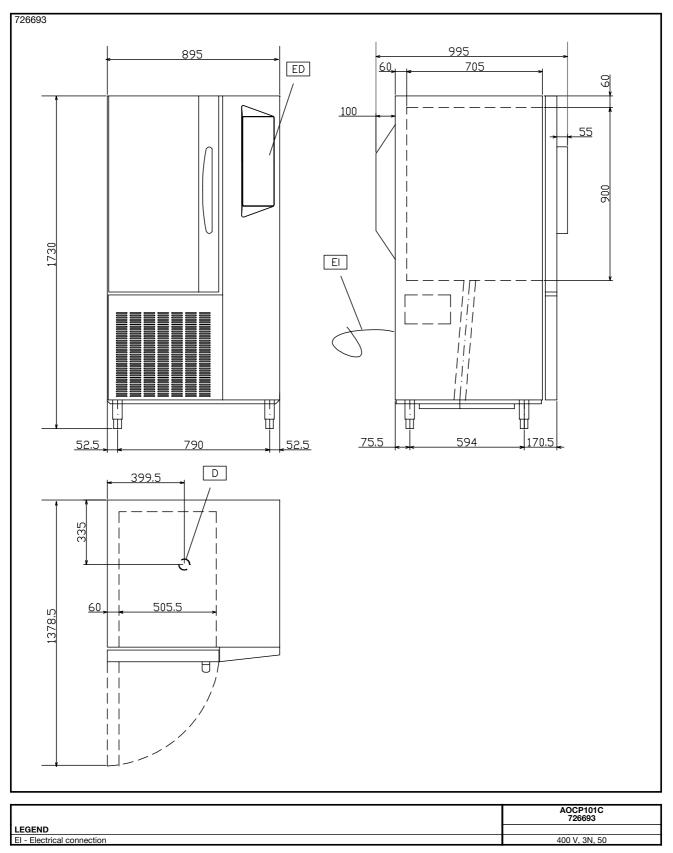

Installation diagram:

- C Water drain
- I Electrical connection
- Y Connection for appliance lifting
- L Remote electrical connection
- N Cooling water inlet
- O Cooling water outlet
